

4 Wavelengths Diode Pumped Solid State Laser

The ARTHOS 20 AC 4WL is an air-cooled diode pumped solid state laser which can be operated with repetition rates from single shot to 100 Hz. Depending on version the system generates light radiation at 1064nm, 532nm, 355nm, 266 nm in short laser pulses. The laser head consists of an optical and an electrical unit. There are all necessary parts for laser operation and communication included.

Features

- 1064nm 532nm
